WHITE PAPER

DATA CENTER INVESTMENT PLAN TOKEN

ABOUT US

Green Block Capital, headquartered in the United Arab Emirates, specifically in Abu Dhabi, specializes in cryptocurrency mining and hosting services. The company not only hosts 2 MW of power in its own and third-party equipment, but it also has business relationships with renowned clients and manufacturers in the cryptocurrency mining sector. Among its notable collaborations are BITMAIN and Whatsminer. In addition, GBT has established relationships with reliable resellers like Minandovoy and MillionMiner. GBT's expansion plan for 2024 is ambitious, aiming to increase its hosting capacity to 22 MW. This expansion reflects the company's commitment to growth and innovation in the field of crypto mining.

EXECUTIVE SUMMARY

Green Block Capital (GBT), after a successful year with its GBC mining utility token, introduces its second token, \$DATA. This new token is focused on the development of hosting infrastructures for DATA Centers, marking a significant step in GBT's growth in 2024.

\$DATA TOKEN OBJECTIVES

\$DATA allows investors to participate in the investment of DATA Centers. Token holders will receive a percentage of the generated revenues, estimated at \$300,000 during the first year, through staking. This innovative approach offers investors a direct opportunity to participate in a growing sector.

Investment and Development Strategy

The capital raised through \$DATA will be allocated to the expansion of GBT's capacity, specifically to build an additional 3 MW of the planned 22 MW. This development is based on GBT's solid experience and proven success in operating DATA Center facilities and managing the GBC token, which has maintained a sustained APW of 1.66% over a year.

COMPETITIVE ADVANTAGES

GBT stands out for its operational reality: the facilities exist and are operational, with a proven track record of returns. The GBT token has generated almost 2 BTC in profits, with a return on investment of 54% in the first year, still maintaining great growth potential.

25% Liquidity

TECHNICAL FEATURES

As a BEP-20 token, \$DATA benefits from the security and efficiency of the Binance Smart Chain, known for its speed and low transaction costs. This technological choice underscores Green Block Capital's commitment to innovation and accessibility.

TOKEN DISTRIBUTION

The distribution of the \$DATA token will be carried out as follows:

17 million \$DATA tokens are reserved for distribution among GBT token buyers, available during the period from December 27, 2023, to February 10, 2024. This allocation will be made in a 1:1 ratio when buying the GBT token in the market..

USER ACCESS AND CONTROL

Green Block Capital offers users an interactive and transparent experience through its app, which connects directly to their wallets. This key functionality allows users to not only monitor the status of their mining and returns but also to gain a complete view of the overall system.

App Features

Mining Status and Returns Visualization: Users can access real-time updated data on the performance of their investments.

Staking in Green Block: Through the app, users can participate in Green Block's staking, where the profit generated by mining and hosting equipment is displayed.

Staking in Data: Through the app, users can participate in Green Block's staking, where the profit generated by hosting bussines from Green Block Capital

Key Dates

From December 27 to February 10: In this phase, GBT buyers will receive the \$DATA token at a 1:1 ratio.

February 15, 2024: A stake distribution in the app GBT of an amount equal to or greater than \$25,000 USD will be carried out.

March 15, 2024: A stake distribution in the app of GBT an amount equal to or greater than \$40,000 USD will be carried out.

March 30, 24: A stake distribution in the app of DATA an amount equal to \$30,000 USD will be carried out.

BTC Rewards

A distinctive feature of the platform is that staking rewards will be paid in Bitcoin (BTC), providing users a direct and valuable way to receive their earnings.

OUR \$DATA VALUES

Agility

Green Block Capital takes pride in its global and robust team, which is fundamental in the launch and management of the \$DATA token. This agility allows us to quickly adapt to changes in the operational context and find innovative solutions, ensuring that the \$DATA project remains at the forefront in a constantly evolving market.

Integrity

Integrity is key in managing the \$DATA token. We prioritize transparency and a holistic approach in all our operations. From collaborating with investors to working with other stakeholders and community members, we put technology at the forefront to ensure fair and equitable decisions.

Innovations

Our dedication to innovation is evident in the \$DATA project, where we strive to revolutionize engineering, software development, and sustainable business models. The \$DATA token exemplifies our commitment, providing accessible investment in DATA Centers and innovative tools for asset management and exchange, all geared towards creating value for stakeholders.

These values form the foundation upon which the \$DATA token is built and managed, reflecting Green Block Capital's mission to be a leading company in the field of crypto mining and DATA Centers.

BUSINESS PLAN

The hosting and mining power rental sector is experiencing growing interest due to its profitability. However, this field faces several challenges, such as limitations in types and costs of equipment, complexity in the selection and maintenance of these, and difficulties in the location of the facilities.

Innovative Solutions from Green Block Capital

At Green Block Capital, we recognize that one of the solutions to these complexities is to offer the rental of large facilities to retail investors, allowing them to access this lucrative business without traditional barriers. Our approach is to eliminate significant obstacles such as:

1. The high initial investment required, often exceeding **\$300,000** for small facilities, as well as the requirement for complex contracts and licenses in other countries.
2. Logistical and noise challenges associated with the installation of mining equipment.
3. The difficulty of using **100%** green energy for the operation and maintenance of the equipment.

Expansion Strategy

Our business plan focuses on the acquisition and development of facilities that facilitate these services. By acquiring and improving these facilities, Green Block Capital aims to provide investors an opportunity to participate in cryptocurrency mining efficiently and sustainably. This strategy not only increases access to the mining market for a broader spectrum of investors but also underscores our commitment to sustainability and energy efficiency.

In summary, Green Block Capital's business plan is a direct response to the current challenges in the cryptocurrency mining sector, proposing innovative and accessible solutions for investors of all levels.
